

This document shows you how to update your ZEST Masternodes that were created with the multi setup script!

1. Download latest QT Wallet from here:
2. Stop your Wallet and replace the file.
3. Start the wallet and leave it for now.
4. Login to your VPS
5. Download and execute the update script

```
wget https://raw.githubusercontent.com/XeZZoR/scripts/master/ZEST/update_180524.sh
chmod 755 update_180524.sh
./update_180524.sh
```

6. Follow the screen:

```
root@ZEST:~# ./update_20182405.sh
Enter 1 to update, enter 2 to check status (Press enter after) ONLY UPDATE ONCE!!!!
1
```

*Enter 1 to update all installed masternodes.*

7. This will update and restart all you nodes on the VPS. Please wait 5 minutes after this.
8. Check if all nodes are running by executing `./update_20182405.sh` again:

```
root@ZEST:~# ./update_20182405.sh
Enter 1 to update, enter 2 to check status (Press enter after) ONLY UPDATE ONCE!!!!
2
{
  "txhash": "a3a8b1f9e44decd03577085aa2f7f371e9c4c64a7fc42a08ab33388f2be05bbc",
  "outputidx": 2,
  "netaddr": "217.163.23.69:8002",
  "addr": "ZE5bfJDnofDzsuYo5WLFUNLXxzP9NwDThe",
  "status": 4,
  "message": "Masternode successfully started"
}
```

*It will now show you the status of every of your masternodes. If those are not successful, please restart them on the GUI (Start All button in QT wallet) and run this step again!*
